

Kismet Park Primary School is committed to developing a school and wider community which is safe, smart and responsible when using the internet.

ThinkUKnow is an Internet safety program with an Australian Federal Police Officer delivering interactive training to parents, carers and teachers through schools and organisations across Australia.

Date: Tuesday the 20th of August, 2013

Time: 6:30—7:30pm

Place: Kismet Park Primary School Building B

Helping you keep your kids safe online.

The ThinkUKnow presentation is divided into three themes of Have Fun, Stay in Control and Report.

In the Have Fun section, the technologies and applications used by young people are discussed. These include instant messaging (IM) and chat rooms, online gaming, peer-to-peer networks, mobile devices and social networking.

This section aims to give parents, carers and teachers a better understanding of how young people have fun using technology and provide a foundation of knowledge so that parents are more confident speaking to their children about their use of the Internet.

The Stay in Control portion of the presentation identifies the main risks which young people face on the Internet or mobile phones.

These include reputation management, privacy management, online sex offenders and online grooming, inappropriate content which is created or accessed, cyber-bullying, e-security risks and protecting your computer.

This section provides parents, carers and teachers with advice on how to prevent young people's exposure to these risks, potential signs that these issues are occurring and advice on how to help young people stay in control whilst using technology.

The final section of the presentation directs parents, carers and teachers on where to report should things go wrong online.
